1882.
INTRODUCTION.

In presenting to the citizens of Guelph their first City Directory, we desire to return our sincere thanks to all those who have so kindly aided us in obtaining the information it contains. Especially are our thanks due to the editors of the local papers for the kindness they have evinced in calling public attention to the author's efforts. Many others have placed us under obligations in furnishing material for the work, and in other ways encouraging us in our arduous task, to all of whom we tender our sincere acknowledgments.

That our work is a perfect one in every respect, we do not claim, but that it is as complete as more than ordinary diligence and care can make such a work, we do not hesitate to assume, and we believe that for all the purposes of a city directory it will be found the most satisfactory reference of this description that has yet been published for this city.

To augment the usefulness of this work we have added, at a considerable expense, a neat lithographic map of the city, showing the outline of every street, location of churches and more prominent buildings, and other interesting features. This will be found the most correct map of the City of Guelph now extant.

The advertisers in this work represent the leading business men of the city, and we most cheerfully commend them to the patronage of all under whose observation these pages may come.

With thanks to friends and patrons generally, we leave our work in their hands, trusting it may meet with that favor which honest endeavor ever wins from a discriminating public.

WM. W. EVANS.

ADDENDA.

SOCIETIES.

UNITED WORKMEN.

MISCELLANEOUS SOCIETIES.

The City of Guelph, the county seat of Wellington, is situated in one of the most fertile portions of the Dominion, about midway between the great lakes. It is built on a number of hills, giving it a picturesque appearance, and is surrounded by a magnificent agricultural and stock raising country, being celebrated, far and near, for the superiority of its products. It is also an important station on the lines of the Grand Trunk and Wellington, Grey and Bruce Railways, which, with their connecting lines, bring it within easy communication with all parts of the Province. The River Speed, a winding stream, with a fall of about 30 feet, passes through the city, affording an abundant water power. The city is distant from Toronto 48 miles, and from Hamilton 30 miles. Within the corporate limits are a number of extensive quarries, from which an excellent quality of limestone is produced for exportation, and which has been used to a large extent in the erection of the public buildings and private residences of the city.

The business streets are lined with many fine blocks and stores, devoted to the varied departments of trade and commerce, while numerous elegant mansions adorn the suburban portions.

The city is supplied with pure spring water, obtained from living springs near the York road, and forced through the mains by means of the Holly system. About 13 miles of mains have thus far been laid, and 98 hydrants located at convenient points for emergencies of fire.

The public buildings of Guelph are all substantial stone buildings, prominent among which may be mentioned the Court House and Jail, City Hall and Market House, High and Central Schools, Post Office and Custom House, Loretto Convent, St. Joseph’s Hospital, General Hospital, &c.
Loretto Convent, founded in 1856, is beautifully situated on an eminence which commands a charming view of the city, the river, and the surrounding country. The edifice, with the church of Our Lady, are the first objects that attract the eye within several miles of the city. The convent is under the superintendence of the Ladies of Loretto, who sustain a boarding and select day school of from 80 to 100 pupils, a select boys' school of some 30 pupils, and are also engaged in teaching the separate schools.

St. Joseph's Hospital and House of Providence, under the superintendence of the Sisters of St Joseph, is located on Hospital street, north of the London road, and is a fine three-story stone building, fitted up with all necessary appointments for the care of the sick. In connection with the Hospital is a farm of 30 acres, from which is procured the vegetables and fruit used in the institution. The Hospital was chartered in 1862, and additions made from time to time, as necessity required. The House of Providence, in connection, is designed for aged people, and those requiring a temporary home. The Hospital is supported by the usual Government and Municipal grants, and voluntary aid. At the time of our visit it contained 12 patients in the Hospital, and 41 in House of Providence.

The General Hospital is located on Delhi street, on the Eramosa Hill, and is a substantial brick building, three storeys in height, with mansard roof, and fitted up with every necessary for the care of the sick. It was erected some seven years ago at a cost of about $10,000. Four acres of ground are attached, from which all the vegetables required are produced, and two cows are kept. The institution is supplied with 50 beds, and, at the time of our visit, 20 patients were under treatment. It is supported by the usual Government and Municipal grants, supplemented by voluntary aid. It is governed by a board of twelve directors, who are elected annually by the contributing members, the Mayor of the city, one member of the Council, and the Warden of the County, being members of the Board. An annual contribution of $4.00 entitles the contributor to a voice in the election of directors. The medical board consists of all the physicians in the city.
There are twelve churches in the city, representing the usual phases of religious belief. The buildings are mostly substantial stone structures, a number of them being models of elegance, ornaments to the city, and finished after the most approved styles of church architecture. There are besides, societies of Christadelphians, Disciples and Plymouth Brethren.

In her school facilities, Guelph has every reason to congratulate herself on the excellent advantages provided, through the wisdom and liberality of her citizens, for the thorough education of her youth. The school buildings, which are among the finest of the city, comprise a high school, central school, and four primary schools, all substantial stone buildings, fitted up with all modern improvements, thoroughly officered with an efficient corps of teachers, and liberally patronized. There is also a Roman Catholic separate school, the Loretto Convent, and several select schools.

The Mechanics' Institute, located in the May's Block, Upper Wyndham street, should also be noted in this connection. The Institute was incorporated in July, 1853, and has a library of between 3,000 and 4,000 volumes. In connection with the library is a commodious and comfortable reading room, supplied with the leading periodicals; also recreation rooms. A winter course of lectures is sustained, and evening classes which are well attended.

The Young Men's Christian Association, on Upper Wyndham street, also sustain free reading and recreation rooms, and a small library for the use of the members.

The manufacturing industries of the city are of an extensive character, a source of wealth and prosperity to its inhabitants, and in some branches rank among the first in the Dominion. Prominent among them may be mentioned Raymond's Sewing Machine Works, employing 200 hands, the Bell Organ Works, employing 100 hands, the facilities of which will be doubled on the completion of their new building now being constructed, the woolen mills of McCrae & Co., employing 175 hands, the Rainer Piano Works, employing 40 hands, Gowdy's Agricultural Works, employing from 50 to 60 hands, Guelph Carpet Factory, employing 35 hands, Silver Creek Brewery, employing 25
hands, the foundry of Thos. Worswick, employing 30 hands, Crowe's Iron Works, 30 hands, Stewart's Planing Mill, 30 hands, the furniture factory of Burr & Skinner, 70 hands, the foundry of W. H. Mills, 21 hands, the cigar factory of Solomon Myers, 20 hands, the Guelph Sewing Machine Works, 60 hands, the extensive flouring mills of David Spence and James Goldie, the Guelph Carriage Goods Works, employing from 50 to 70 hands, the organ factory of Wood, Powell & Co., the foundry of Robertson & Son, Guelph Malleable Iron Works, Guelph Axle Works, the oatmeal mill of H. Murton, Tolton's Agricultural Works, the Union Foundry, Thain's Agricultural Implement Factory, and others of lesser note, a more full description of which will be found under the head of Principal Manufactories.

Several first-class hotels, notably the Royal, Wellington, New Western, with others of more humble pretensions, supply all the comforts of a home to the travelling public.

The city supports two ably managed daily papers, the Herald and the Mercury, both of which are liberally patronized.

The Institution, known as the "Ontario School of Agriculture and Experimental Farm," is situated about a mile to the south of the city. The farm consists of 550 acres, about 400 of which are cleared. It is composed of almost every variety of soil, and hence is well suited for the purposes for which it was selected. Work commenced in May, 1874. Since that time considerable progress has been made. Many improvements have been made on the Farm. A considerable portion of it has been well drained, suitable implements have been provided, and a very fair representation of stock secured. The Horticultural Department has been thoroughly established, and is now one of the most efficient means of Education in connection with the Institution. The Institution is well office:ed by an efficient corps of instructors, the Farm being divided into five distinct departments, viz.: Live Stock, Field, Horticultural, Mechanical, and Experimental. The instruction received in the class-room is, as far as possible, illustrated and exemplified in the fields, yards and shops. A diploma is given to each student who completes his
course of study, and passes satisfactorily all examinations, both on the subjects contained in the curriculum, and on the work of his apprenticeship. The buildings have been erected on an elevated portion of the Farm, on the north side of the Dundas road, commanding an extensive view of the surrounding country, and the City of Guelph. The principal entrance is from the Dundas road, at the southwest angle of the grounds in front of the buildings, which have been skilfully planted; the hot-houses and horticultural gardens being in the south-east part of the premises, and having a separate entrance on the Dundas road. The buildings now completed occupy a space of 240 feet in front by 180 feet in depth, and contain a reception-room and office, four large class and lecture-rooms, with dining and reading-rooms, library, dormitories for 130 pupils, bath-rooms and lavatories, and apartments for the President, Professor of Agriculture, Assistant Master, and Bursar, also Matron's and servants' rooms. There are also commodious farm buildings, of stone and wood, with enclosed yards. The total cost of land, buildings, furnishings, &c., amount to about $200,000. The Institution is liberally patronized, and a credit to the Province.

The city of Guelph was founded by the well known novelist, John Galt, who was then acting as Commissioner for the Canada Company, the original proprietors of the land. The historic spot where the first tree was felled is to be found near the Grand Trunk passenger station, the embryonic city being then and there christened "Guelph" with due solemnity. This event took place on the 23rd of April, 1826, being St. George's day. Mr. Galt, in speaking of the event, says:

"The founding of a town, like the launching of a vessel, was an era of which the horoscope might be cast. I accordingly appointed a national holiday for the ceremony which secretly I determined should be held in remembrance. * * * The tree fell with a crash of accumulating thunder, as if ancient nature were alarmed at the entrance of social man into her innocent solitudes, with his sorrows, his follies and his crimes. I do not suppose that the sublimity of the occasion was unfelt by others, for I noticed that after the tree fell there was a funereal pause, as when
the coffin is lowered into the grave; it was however of short duration, for Dr. Dunlop pulled a flask of whiskey from his bosom, and we drank prosperity to the city of Guelph. The name was chosen in compliment to the Royal Family, both because I thought it auspicious in itself, and because I could not recollect that it had ever been before used in all the King's dominions. * * *

In planting the town I stipulated that half the price of the building sites should be appropriated to endow a school. The school-house was thus among the first buildings undertaken to draw settlers," Mr. Robert Thompson, still a resident of the city, and one of the first year's settlers, in a sketch of the early history of Guelph, to which we are indebted for the following facts, states that "On the centre of this stump [of the first tree felled] the surveyor John McDonald, planted his compass staff, and declared it to be the centre of the city prospective; but a very serious difficulty presented itself at this juncture. This tree stood near the banks of the River Speed, which formed the extreme eastern limits of the plot or hillock set apart as the site proper for the town; and how to fix the centre and circumference on one and the same spot was a problem very difficult to solve. The doctor, however, was quite equal to the emergency, and at once suggested the ladies' fan, to which all present gave hearty consent. The stump was afterwards fenced round, neatly levelled and dressed on the top, and a sun-dial placed on it, which answered as the town clock for several years.

"Ready employment and remunerative wages soon brought reinforcements of craftsmen of various kinds to the place, insomuch that great inconvenience was experienced for a time in finding even temporary accommodation for the workmen and their families. The first three months were mainly occupied in clearing up the land and erecting log houses in different parts of the town."

"Early in July an opening celebration was mooted, and finally the King's birthday was fixed upon for the occasion. All hands were soon set to work in making the necessary preparations. A large frame building to be called a market house was soon in course of erection, and was to be used on the occasion as a place of amusement and festivity. * * *
* * The King’s birthday happening to fall on Sunday the celebration must necessarily come off on Monday the 13th, but Sunday did not prove a day of rest. The new market house was only about half shingled. The ox had to be dressed and made ready for the roast, and various other little preliminaries preparatory to the occasion. The day came, and visitors from various parts began to flock in. The band from “Little York,” now Toronto, was in attendance. Mr. Gurnett, of Ancaster, editor of the Gore Gazette, was present, and had quite a lengthy article in his next issue. Waterloo, Galt, Eramosa, and Woolwich were all represented. About five hundred strangers in all were present early in the morning. The dressed ox had been placed on a windlass in front of a burning log pile and turned as on a spit for about six hours. He was then cut in pieces and served up. Two pot-ash kettles of potatoes were by this time also ready for serving up, together with plenty of bread, hemlock tea, and whiskey. The entire company were supplied with a plain but sumptuous dinner; the only attempt at ornamentation being the head and horns of the bullock placed on a large side dish at the head of one of the tables. All were satisfied that the ox had been roasted whole, but very few of those who partook believed that the whole of the ox was roasted.

“Next on the programme was the ceremony of laying the foundation stone of the two first stone buildings in the town. One of these was intended for a bank. It was located on or about the spot where the Grand Trunk Passenger Station now stands. It was finished in the spring of 1828, and used for some months as an office by some of the Canada Company’s clerks. The other referred to was a school-house located a few chains further to the east. Mr. David Matthews was the teacher in this house for the first ten or fifteen years. It was also used as a meeting-house or church by the various religious denominations for several years after its erection. The amusements of the day were varied and diversified. The only thing that attracted much attention was the firing of wooden cannon. These were made of beech and maple logs about two feet in length and one foot in diameter, with a two-inch bore, and bound with three strong iron bands, generally bursting about the
first or second shot. A few fights brought the day’s proceedings to a close, and the crowd generally dispersed. Some, however, of the more aristocratic remained for the evening. A ball and supper was to come off in the priory. The tables were spread in the main building, as yet in an unfinished state. From sixty to eighty sat down to a sumptuous supper, Mr. Galt at the head of the table and the old Doctor acting as Vice. What followed the removing of the cloth may be easier imagined than described. Suffice it to say the ‘nicht drave on wi’ sangs an’ clatter, and aye the grog was growin better.’ The ball was led off by Mr. Galt and Mrs. Leaden. Farther on in the evening, however, a row ensued, and one Thomas Brown, acting as Constable pro tem., while endeavouring to restore peace, had one of his hands badly cut by a carving knife in the hands of one of the rioters. Brown was in consequence appointed Grog Boss among the company’s workmen. This Brown was father of the first child born in the town. Letitia Brown, infant, was the grantee of a house and lot as a free grant from the Canada Company promised to the first born in the town. The lot referred to is eighty-five on Quebec street.

“A brisk business in building continued during the remaining part of the season. The buildings, however, were for the most part of a somewhat different class from those erected in the early part of the season. A frame store was erected and kept by the firm of Gilkison & Leaden. It stood on East Market Square, near the Grand Trunk Station. A saw-mill was erected by the same firm on the site where the People’s Mills now stand. Jenkins & Oliver built a stone store just opposite the first mentioned on the north-west side of the Square. * * * * Early in the spring of 1828 two other stores were opened on the south side of Upper Market Square—one by Thomas McVane, who occupied a log house opposite the drill shed; the other was a frame building a little further eastward, with one Charles McCrae as its proprietor.”

“By this time the town had assumed such proportions that it was deemed desirable to hold semi-annual fairs. So the first Mondays in May and November were the days named. The first May Fair in Guelph was a day long to be remembered. The show of stock, however was some-
thing very different from what was exhibited at our last Easter Fair. Three cows and two yoke of oxen comprised the entire stock on the ground.” “A portion of what is known as the old burying ground was cleared off early in August, 1828, and the first one buried was a man named Reid, one of the first year’s settlers in the Scotch Block on Elora Road.”

The first death was that of a brewer or beer peddler, named Stephen Tuttle, who was killed by the fall of a tree, on the Waterloo road.

“The first Sunday School was opened by Mr. Buchanan, British Consul, in August, 1825, while in Guelph on a visit for a few days from New York. It was in a small log house on South Market Square, owned by the late Benjamin Harrison, who, with his wife, were among the teachers. The first school teacher in the town was a man named Davis, who opened a private school for a few months towards the end of 1827. An office for job printing was opened on Waterloo street early in 1828, by a man named Chatterton, existing only some six months. The Canada Company’s offer of a town lot and house for the first weaving done in the town was awarded to the late James Hodgert, Esq., who had a loom running in the winter of 1827-8. This lot is situate on the corner of Quebec street and St. George’s Square, lately the property of the Messrs. Heffernan. The first marriage solemnized was that of Christopher Keough to Miss Ann Green in September, 1827. The first practising physician in the town was a Doctor Welsh, in 1827.”

Guelph was incorporated as a town in 1856, with a population of 3,000, which had increased to 5,500 in 1867, and in 1879, on the 52nd anniversary of the cutting of the first tree, was declared a city by Royal Proclamation, with a population of nearly 11,000.
